Music's The Pianola Piano Open Door

The PIANOLA Piano owes its rapid growth of popularity to two facts:

First, it satisfies the craving for music that is nherent in human nature.

Second, it provides the fascination of personally producing the music.

When you play the PIANOLA Piano, you enjoy not only the melody and harmony but the even greater charm of putting into the performance your own individuality and taste.

Yours is the touch that creates the strains, yours the zest of the melody.

The PIANOLA Piano has better aids for expression and is more responsive to the per-former's slightest wish than any of its imitators. That is why it is so much more artistic and why a performance on it is so much more interest to a person of musical taste.

Vitally important improvements such as the METROSTYLE, THEMODIST, etc., are exclusive with the PIANOLA Piano. Over 300 patents prevent the copying of the features that have made the PIANOLA and PIANOLA Piano recognized as the "Standard" instruments of the kind throughout the world.

Meser. Steinway & Sons, in selecting the PIANOLA as the only Player to be incorporated with their pianos, confirm the opinion of the musical world as to its absolute superiority. The sale of the Steinway PIANOLA Piano is controlled by the Aeolian Company. On exhibition in Manhattan only at Aeolian Hall.
